**Student Sports - Concussions**

The Executive Committee of the Board of Directors recognizes that concussions and head injuries are commonly reported injuries in children and adolescents who participate in sports and other recreational activities. The Executive Committee of the Board of Directors acknowledges the risk of catastrophic injuries or deaths are significant when a concussion or head injury is not properly evaluated and managed.

Any coach of intramural or interscholastic athletics employed by the Agency shall complete an initial training course, approved by the State Board of Directors, regarding concussions which are a type of brain injury prior to commencing the coaching assignment for the season. Such training course shall include, but not be limited to (1) the recognition of the signs and symptoms of a concussion; (2) the means of obtaining proper medical treatment for a person suspected of having a concussion; (3) the nature and risk of concussions, including the danger of continuing to engage in athletic activity after sustaining a concussion; and (4) the proper method of allowing a student athlete who has sustained a concussion to return to athletic activity.

Each year any coach who has completed the initial training course regarding concussions shall annually review current and relevant information, developed or approved by the State Board of Directors, regarding concussions prior to the start of the coaching assignment. This annual review is not required in any year the coach is required to complete a refresher course. A coach must complete an approved refresher course not later than five years after the initial training course in order to maintain his/her coaching permit and to coach in the Agency.

Annually the Agency will distribute a head injury and concussion information sheet to all parents/guardians of student participants in competitive sport activities. The parent/guardian and student must return a signed acknowledgement indicating that they have reviewed and understand the information provided before the student participates in any covered activity. This acknowledgement form must be returned and be on file with the Agency in order for the student to be allowed to practice or compete in the sports activity.

All coaches will complete training pertaining to the School’s procedures.

The required refresher course regarding concussions shall include, but not be limited to, an overview of key recognition and safety practices, an update of medical developments, current best practices in the field of concussion research, and prevention and treatment. Said refresher course shall also contain an update on new relevant federal, state and local laws and regulations, and for football coaches, current best practices regarding coaching the sport of football, including, but not limited to, frequency of games and full contact practices and scrimmages as identified by the governing authority for intramural and interscholastic athletics (CIAC).

The Agency, shall implement the "Concussion Education Plan and Guidelines for Connecticut Schools," developed by the State Board of Directors per the stipulations of P.A. 14-66. Written materials, online training or videos, or in person training shall address, at a minimum, the
recognition of signs or symptoms of concussion, means of obtaining proper medical treatment for a person suspected of sustaining a concussion, the nature and risks of concussions, including the danger of continuing to engage in athletic activity after sustaining a concussion, proper procedures for return to athletic activity and current best practices in the prevention and treatment of a concussion.

The Executive Committee of the Board of Directors recognizes that the CIAC prohibits student athletes from participation in any intramural or interscholastic activity unless the student athlete and his/her parent/guardian completes the concussion education plan of the State Board of Directors and its contributing organizations to such plan. Prior to participating in any intramural or interscholastic athletic activity students must (1) read written materials, (2) view online training videos, or (3) attend in-person training regarding the Agency's concussion education plan provided by the Board of Directors.

Prior to participating in any intramural or interscholastic athletic activity for the school year, a parent/guardian of each student athlete must (1) read written materials, (2) view online training videos, or (3) attend in-person training regarding the Agency's concussion education plan.

The Agency will utilize the consent form developed or approved by the State Board of Directors with parent/guardians of student athletes in intramural or interscholastic activities regarding concussions. This form shall provide a summary of the concussion education plan developed or approved by the State Board of Directors and a summary of the Agency’s Board of Directors’ policy regarding concussions. The consent form shall be returned to the appropriate school authorities, signed by the parent/guardian, attesting to the receipt of such form and authorizing the student athlete to participate in the athletic activity.

Further, in compliance with applicable state statutes, the coach of any intramural or interscholastic athletics shall immediately remove any student athlete participating in intramural or interscholastic athletics who (1) is observed to exhibit signs, symptoms or behaviors consistent with a concussion following an observed or suspected blow to the head or body during a practice, game or competition, (2) is diagnosed with a concussion, or (3) is otherwise suspected of having sustained a concussion because such student athlete is observed to exhibit signs, symptoms or behaviors consistent with a concussion regardless of when such concussion or head injury may have occurred. Upon such removal, the coach or other qualified school employee defined in Connecticut General Statutes 10-212a, shall notify the student athlete's parent/guardian that the student athlete has exhibited such signs, symptoms, or behaviors consistent with a concussion or has been diagnosed with a concussion. Such notification shall be provided not later than twenty-four hours after such removal. However, a reasonable effort shall be made to provide such notification immediately after such removal.

The coach shall not permit such student athlete to participate in any supervised athletic activities involving physical exertion, including, but not limited to, practices, games or competitions, until such student athlete receives written clearance to participate in such supervised athletic activities involving physical exertion from a licensed health care professional* trained in the evaluation and management of concussions.
Following medical clearance, the coach shall not permit such student athlete to participate in any full, unrestricted supervised athletic activities without limitations on contact or physical exertion, including, but not limited to, practices, games or competitions and such student athlete (1) no longer exhibits signs, symptoms or behaviors consistent with a concussion at rest or with exertion, and (2) receives written clearance to participate in such full, unrestricted supervised athletic activities from a licensed health care professional trained in the evaluation and management of concussions.

"licensed health care professional" means a physician licensed pursuant to Chapter 370 of the General Statutes, a physician assistant licensed pursuant to Chapter 370 of the General Statutes, an advanced practice registered nurse licensed pursuant to Chapter 378 of the General Statutes or an athletic trainer licensed pursuant to Chapter 375a of the General Statutes.

The Board, as required, will collect and report to the State Board of Directors all occurrences of concussion. The report shall contain, if known, the nature and extent of the concussion and the circumstances in which it was sustained.
